

FOR IMMEDIATE RELEASE

K-Sun's Award-Winning Advanced Safety Sign-Making Software Now Available for Vista

Oct. 16, 2008—SOMERSET, WIS.—K-Sun Corporation's award-winning MaxiSoft® MaxiSigns® V.2 safety sign, label and tag-making software is now available for the Windows Vista platform.

The easy-to-use software works with Vista, XP and 2000 and saves thousands of dollars over signs that need to be designed, manufactured and shipped. A leader in manufacturing, hospital, laboratory, school and many other settings, MaxiSign® sets the standard for safety, homeland security, lockout-tagout, informational and general facility sign-making applications.

Recognized nationally by Compliance Magazine, MaxiSigns® V.2 won the magazine's Commitment to Worker Safety Award for ease of use and for being the best identification solution for creating safety and security signs, saving lives, preventing injuries, and improving efficiency and identification compliance.

MaxiSigns® V.2 makes it convenient and economical to design and print professional OSHA-mandated and ANSI-compliant safety signs, placards, tags and labels with any PC-compatible desktop printer. Its library includes thousands of safety pictographs plus ergonomic, AED, recycling, lockout/tagout, IMO and ANSI/ISO harmonized symbols. Plus MaxiSigns® is the only software to feature 580 symbols used for Homeland Security (HLS) directions and signs.

Other features include:

- More than 5,000 preformatted safety, ANSI/OSHA, HLS and IMO signs plus 1,300 ISO, IMO, HLS, AED, ADA, ARC, ergonomic, laser, recycling, recreational and shipping symbols and pictographs.
- Convenient text editing/formatting and graphic-file importing for creating custom signs, tags or labels or customizing preformatted signs.
- Six sizes of polyester die-cut, adhesive-backed media can be applied directly, laminated for extra durability, or mounted on rigid sign boards.
- One-click translation into Spanish, Canadian French and mono/bi/trilingual or customize to any language once the appropriate font is installed.
- Vertical and horizontal layout sizes from 1.5" x 2" to 11" x 17".
- Print up to 18 per page.

MaxiSigns® V.2 simplifies the work for safety professionals. Plant managers will appreciate the ease in creating visual consistency via colors, pictographs, applications, layouts and directional signage throughout their facilities. MaxiSigns® V.2 also contains regulation summaries that help safety professionals understand compliance requirements.

About MaxiSoft/K-Sun

MaxiSoft®, a division of K-Sun Corporation, is the leading developer of safety identification software and has been focused on providing innovative products and free technical support to its customers since 1995.
